5. Design Zero-shot, One-shot, and Few-shot Prompts to Generate a Promotional Social Media Post for an AI Workshop

Aim

To design zero-shot, one-shot, and few-shot prompts that generate engaging, accurate promotional social media posts for an AI Workshop.

Algorithm

1. Collect the workshop title, date, time, venue, audience, topics, fee, and registration method.

2. Write a common instruction specifying platform, tone, word limit, required event details, and a call to action.

3. Create a zero-shot prompt without examples, a one-shot prompt with one example, and a few-shot prompt with two examples.

4. Submit the prompts to the same language model with the same settings.

5. Check the generated posts for accurate event details, readable formatting, engaging language, and a clear registration instruction.

Demonstration Note

All workshop and example event details in this document are fictional. The posts are classroom examples and should be updated before real publication.

Prompt Designs

Common Instruction

Create an engaging promotional Instagram post for an AI Workshop using only the supplied event details. Use an energetic but professional tone and 60-90 words, excluding hashtags. Include the title, date, time, venue, audience, topics, fee, registration action, and exactly three relevant hashtags. Do not invent speakers, certificates, prizes, limited seats, or registration links.

Zero-shot Prompt

Use the common instruction followed by the target workshop details in the Input section. Do not supply an example.

One-shot Prompt

Use the common instruction, Example 1 below, and the target workshop details.

Example details: Python Basics Workshop; 5 November 2026; 10:00 AM-12:00 PM IST; Lab 1; beginners; Python syntax and simple programs; free; register at the department office.
Example post: Start your coding journey! Join our Python Basics Workshop on 5 November 2026, from 10:00 AM to 12:00 PM IST in Lab 1. Designed for beginners, this session introduces Python syntax and simple programs. Explore essential concepts and take a practical first step towards learning programming. Entry is free. Register at the department office and begin building your coding confidence!
#Python #CodingWorkshop #LearnToCode

Few-shot Prompt

Use the common instruction, Example 1 from the previous page, Example 2 below, and the same target workshop details.

Example details: Data Visualization Workshop; 9 November 2026; 2:00-4:00 PM IST; Lab 2; students; charts and dashboards; free; register at the department office.
Example post: Turn data into clear stories! Attend our Data Visualization Workshop on 9 November 2026, from 2:00 PM to 4:00 PM IST in Lab 2. This session is designed for students interested in presenting information clearly. Explore charts and dashboards and discover how visual choices can make data easier to understand. Entry is free. Register at the department office to join us! #DataVisualization #StudentWorkshop #LearnWithData

Python Program

Python 3 prompt builder; no external packages are required. Paste each printed prompt into a language model. This program does not automatically generate social media posts.

```
instruction = input("Common instruction: ")
example1 = input("Example 1 (one line): ")
example2 = input("Example 2 (one line): ")
details = input("AI Workshop details: ")
prompts = {
   "Zero-shot": instruction,
   "One-shot": instruction + "\n" + example1,
   "Few-shot": instruction + "\n" + example1
            + "\n" + example2
}
for name, prompt in prompts.items():
   print("\n" + name + " PROMPT")
   print(prompt + "\nTarget details: " + details)
```

Input

Enter the common instruction and both complete examples above. Enter each example on one input line, with spaces between its parts.

Target details: AI Workshop: Explore, Learn, Create. Date: 6 November 2026. Time: 10:00 AM-1:00 PM IST. Venue: Computer Lab 3. Audience: college students and beginners. Topics: AI basics, prompt engineering, and a practical demonstration. Fee: free. Registration: department office. Platform: Instagram.

Output: Illustrative Promotional Posts

These are prepared sample responses, not outputs from an external model run. Word counts exclude the three hashtags and use whitespace splitting.

Zero-shot Post (62 Words)

Curious about artificial intelligence? Join AI Workshop: Explore, Learn, Create on 6 November 2026, from 10:00 AM to 1:00 PM IST in Computer Lab 3. Designed for college students and beginners, the workshop covers AI basics, prompt engineering, and a practical demonstration. Discover new ideas and explore how AI can support learning and creativity. Entry is free! Register at the department office.
#AIWorkshop #LearnAI #PromptEngineering

One-shot Post (63 Words)

Start your AI learning journey! Attend AI Workshop: Explore, Learn, Create on 6 November 2026, from 10:00 AM to 1:00 PM IST in Computer Lab 3. College students and beginners can explore AI basics, prompt engineering, and a practical demonstration. Take your first step towards understanding artificial intelligence in an approachable setting. Entry is free. Register at the department office to join us!
#AIWorkshop #ArtificialIntelligence #StudentLearning

Few-shot Post (64 Words)

Ready to explore the world of AI? Join AI Workshop: Explore, Learn, Create on 6 November 2026, from 10:00 AM to 1:00 PM IST in Computer Lab 3. This free workshop welcomes college students and beginners. Explore AI basics, learn about prompt engineering, and follow a practical demonstration. Bring your curiosity and start discovering what artificial intelligence can offer. Register at the department office!

Review of the Sample Posts

Zero-shot

Uses a question as the opening hook, preserves all event details, and ends with a clear registration action. Its wording is direct and easy to scan.

One-shot

Follows the example structure: invitation, logistics, learning topics, free entry, and registration. The tone is friendly and suitable for a student audience.

Few-shot

Uses a question, groups the audience and fee clearly, and presents the topics with action verbs. It keeps the registration action visible and uses exactly three hashtags.

Validation

All three sample posts include the workshop title, date, time zone, venue, audience, topics, fee, and registration method. Each meets the 60-90 word limit excluding hashtags and includes three hashtags. None adds unsupported speakers, certificates, prizes, or booking links.

Result

Zero-shot, one-shot, and few-shot prompts were designed for promoting the AI Workshop. The sample posts are complete and appropriate for a classroom demonstration. Examples provide guidance on tone and structure; the best prompt depends on the responses produced by the selected model.
